

Grandparents:

Protect
Yourself
and Your
Grandbaby
from
Whooping
Cough!

Why Whooping Cough is Serious:

Whooping cough (also known as pertussis) is a contagious disease that can be passed easily from person to person. It is very serious for babies and can cause them to cough so much that they cannot breathe. Hundreds of babies are hospitalized each year for whooping cough, and some die from it.

Whooping cough can cause adults or teens to have severe coughing that leads to vomiting or broken ribs. They can be hospitalized for pneumonia and miss weeks of work or school. Even worse, they can spread whooping cough to the babies at home.

Ways to Protect Yourself and Your Family:

Get Your Tetanus Booster (Tdap)

Everybody in the family should be immunized against whooping cough to protect themselves and the baby at home. Adults should ask their doctor for the new Tdap vaccine that includes a tetanus and diphtheria booster and also protects against whooping cough.

Make Sure Your Grandchildren are Up-to-Date on Their Immunizations

Children 11 years of age and older can get the new Tdap booster. Infants and toddlers need four shots against whooping cough, and a booster before starting kindergarten.

Cover Your Cough and Wash Your Hands

Whooping cough is spread by coughing. Remind everyone to cover their mouths when coughing and to wash their hands often.

Protect yourself. Protect your family.
Get Immunized!

Dear Colleague,

The Washington State Department of Health (DOH) provides print-ready files (PDFs) of health education materials. To ensure that the original quality of the piece is maintained, please read and follow the instructions below and the specifications included for professional printing.

- **Use the latest version.** DOH materials are developed using the most current information available, are checked for clinical accuracy, and are field tested with the intended audience to ensure they are clear and readable. DOH programs make periodic revisions to educational materials, so please check this web site to be sure you have the latest version. DOH assumes no responsibility for the use of this material or for any errors or omissions.
- **Do not alter.** We are providing this artwork with the understanding that it will be printed without alterations and copies will be free to the public. Do not edit the text or use illustrations or photographs for other purposes without first contacting us. Please do not alter or remove the DOH logo, publication number or revision date. If you want to use a part of this publication for other purposes, contact the Office of Health Promotion first.
- **For quality reproduction:** Low resolution PDF files are intended for black and white or color desktop printers. They work best if you are making only one or two copies. High resolution PDF files are intended for reproducing large quantities and are set up for use by professional offset print shops. The high resolution files also include detailed printing specifications. Please match them as closely as possible and insist on the best possible quality for all reproductions.

If you have questions, contact:
